David De La Cuesta Madrid

Systems and Computer Engineering Student · Full Stack Development

daviddelacuesta123@gmail.com | +57 305 336 9494 | Medellín, Colombia | LinkedIn | GitHub

PROFILE

22-year-old full stack developer, currently in the eighth semester of Systems and Computer Engineering at Universidad Pontificia Bolivariana (UPB). Solid experience building web applications with Java and C#, with a focus on clean, scalable architectures. English level: B2.

TECHNICAL SKILLS

Languages: Java, C#, JavaScript, TypeScript
Frontend: React.js
Backend: Spring Boot, Node.js
Databases: PostgreSQL, Supabase, Oracle
Cloud: AWS, Oracle Free Cloud
Architectures: Domain-Driven Design (DDD), Microservices, Clean Architecture
Tools: Git, GitHub, Docker
Methodology: Scrum

EDUCATION

B.S. in Systems and Computer Engineering · 8th semester
Universidad Pontificia Bolivariana (UPB) — Medellín, Colombia
2021 – Present

English — Level 7 (B2)
EAFIT Language Center (EAFIT Idiomas) — Medellín, Colombia

KEY COMPETENCIES

- Design and implementation of RESTful APIs with Spring Boot and Node.js
- Application of Clean Architecture for separation of concerns and maintainable code
- Development of dynamic user interfaces with React.js
- Domain modeling using DDD and microservices patterns
- Relational database management with PostgreSQL and Supabase
- Service deployment and containerization with Docker and AWS
- Version control and collaborative workflows with Git and GitHub
- Agile teamwork using the Scrum methodology
